# ABOUT US

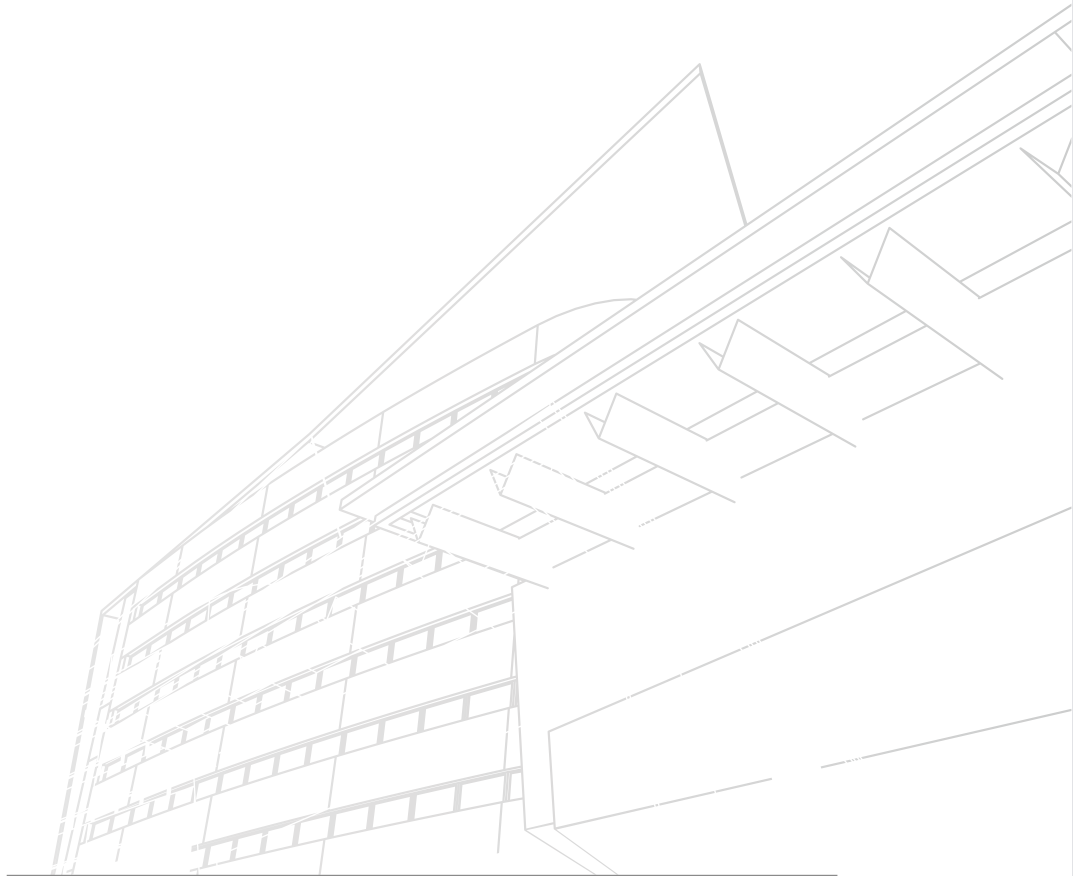

It is very gratifying to profile Black Cobra Group before you. It is our way of acknowledging your creativity, taste, eye for quality and sustainability.

Black Cobra Group is a distinguished pillar of the Indian building materials sector since 1992. It manufactures high-quality plywood under the brand name Black Cobra, which is among the top 10 plywood brands in the country. The Group has over 1 million square feet of manufacturing space spread across 6 manufacturing plants.

The group also manufactures Aluminium Composite Panels under the brand name of “Alex Panels”, which is among the pioneers of the ACP industry in India and among the top 5 ACP brands in the country. The products of the group are trusted by leading institutions in India such as ITC, DLF, Supertech, Delhi Metro Rail Corporation, Indian Oil, LIC, SBI, HDFC, LG, Patanjali, Volkswagen, PWD, Samsung, Airports Authority of India, MMRDA, IGL, Shapoorji Pallonji, & more.

Apart from manufacturing a diverse range of building materials (such as plywood, shuttering, flush doors, laminates, PVC boards, ACP, etc), the Group has also etched its mark in the Education sector with a resplendent chain of institutions called Quantum University in Roorkee which is ranked among the top 60 B-schools in India by the Times Group.

## **Vision**

We aspire to be at the forefront of innovation and sustainability in the building materials industry and provide cutting edge solutions in diversified fields, thus building long lasting bonds with our clients and walk the path of attaining stupendous heights of success together.

## **Mission**

Creating a beautiful future is in our hands and is also one of our major responsibilities to give the best to the future generation. With this aspect in mind, we manufacture high quality, sustainable and economical building materials, all under one roof to enable professionals and experts to convert their ideas into beautiful and sustainable buildings, building a nation of dreams and versatility.

# GROUP HISTORY

- 
- 01 1992 Entered the market with Plywood range
  - 02 1998 Expanded to a range of Doors
  - 03 2005 Launched Alex Aluminium composite Panels
  - 04 2008 Established Quantum University in Roorkee
  - 05 2016 Started manufacturing WPC
  - 06 2017 PVC Laminates and WPC Door Frame
  - 07 2018 Incorporated Laminates in our range
  - 08 2020 Fire Retardant ACP range introduced

# OUR PRESTIGIOUS CLIENTS

We have been serving quality building materials to some of the most respected names in the industry since 1998.

# PAN INDIA PRESENCE

Black Cobra has successfully spread its wings to every corner of the country and to countries outside of India as well. With over 10+ company operated godowns, 50+ renowned distributors and 2000+ Dealers and channel partners throughout India, Black Cobra has truly established itself as a Pan Indian brand.

# CERTIFICATIONS AND RECOGNITIONS

As a mark of our standard of quality, which are maintained throughout, Black Cobra group has been recognized and awarded by several institutions for its above par quality of its various products.

## PRODUCT RANGE

# COMMERCIAL PLYWOOD

Veneers from high-quality logs are mechanically dried and they undergo a stress-relieving process, which are assembled in such a way to form a balanced construction. High quality fortified synthetic resins are used for gluing the veneers. The glue line is poisoned by special formulations of chemicals to make Black Cobra Plywood safe against borers. It is hot pressed under proper temperature and more than 16 kg/cm<sup>2</sup> specific pressure. Conditioning is done after pressing followed by preservative treatment.

Applications: Living room, study room, offices, wall paneling, partitioning.

# MARINE PLYWOOD

Black Cobra Marine Plywood is the outcome of a perfect amalgamation of excellent quality raw inputs, advanced technology, and expertise of our diligent team. While manufacturing the Marine Grade Plywood, we make sure that all the stages such as gluing, cold pressing, hot pressing, sanding are carried out under the instructions of experts. The finished plywood is examined for ideal dimensions, visual imperfections, and quality finish before stamping it with Black Cobra hallmark.

Applications: Outdoor furniture in gardens, decks, porches.

# SHUTTERING PLYWOOD

This plywood range is manufactured from superior quality wood, procured from the most reliable vendors in the industry. The offered Resin Coated Shuttering Plywood is thoroughly quality tested after the production is completed. Our team of expert quality inspectors conducts the tests by employing requisite evaluation tools and equipment. They ensure that the entire range is durable, tough and environment friendly.

Applications: Factories and buildings, construction of sewer, swimming pools, bridges, exterior, and general shuttering work, beams, building construction and foundation job.

# CALIBRATED PLYWOOD

Plywood that has gone through a process called calibration is known as Calibrated Plywood. Calibration is a process from which uniform thickness and smooth surface of plywood are achieved. It helps in the uniform application of adhesive, in turn improving the strength and life of the plywood.

Applications: OEMs, Indoor furniture, Kitchen cabinets, Table tops and other areas where large stained wood surfaces are needed.

# FLUSH DOORS

Black Cobra Flush Doors are stylish, durable, environment friendly and nominally priced, which make them one of the most sought after products among our global clients. Our quality management schemes begin as soon as we acquire the raw inputs from our vendors. These inputs are used in the manufacturing stages only after their superior properties are conformed by our quality testers. The expert quality inspectors hired by our organization not only supervise the production stages, they also test the finished output to confirm that the Decorative Flush Doors are devoid of any manufacturing flaws.

Applications: Door shutters in homes and offices.

# ACP

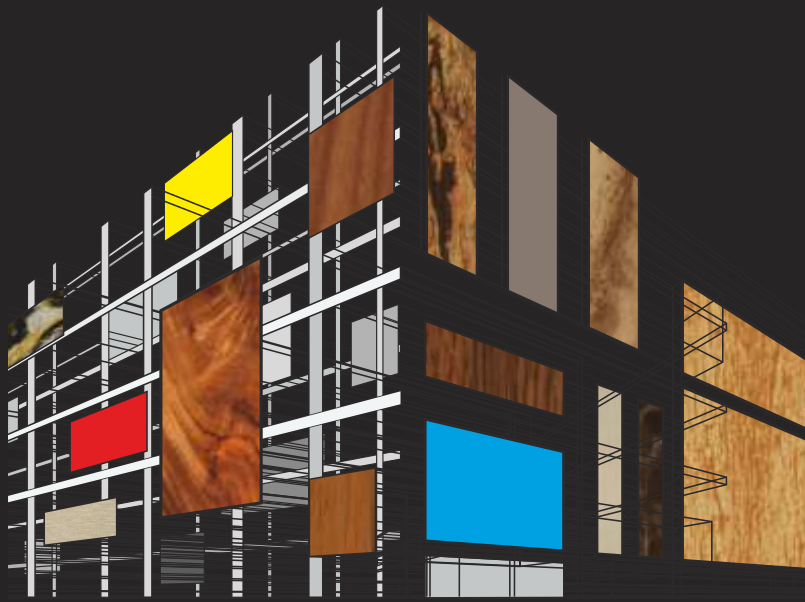

Alex Panels are high-grade ACPs (Aluminum Composite Panels), which are majorly used on exterior walls and facades of buildings. ACPs are also sometimes known as sandwich panels. These are made with a composite material in which thermoplastic polythene core and fire-retardant core material are sandwiched between two color coated aluminum sheets.

At Alex Panels, we keep innovating and improving the product in our Research & Development wing. Working on global standards, we keep an eye on International development in the ACP sector and offer the best to our clients. Alex Panels are available in a wide range of collections, color shades and textures to give a trendy and stylish look to your buildings and structures and suit your vivid imaginations.

# ACP

## Features

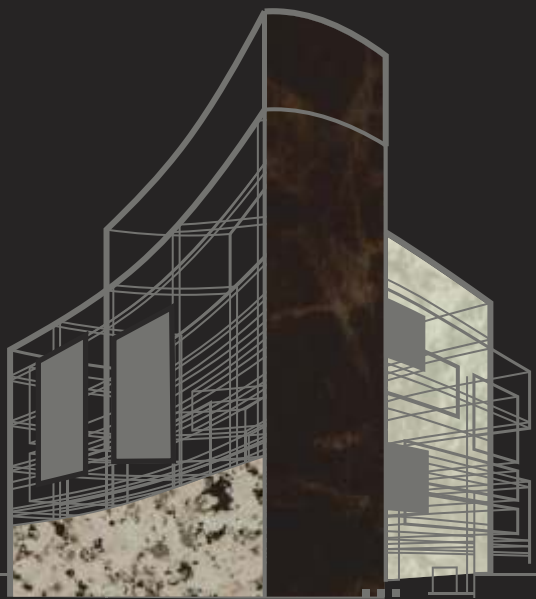

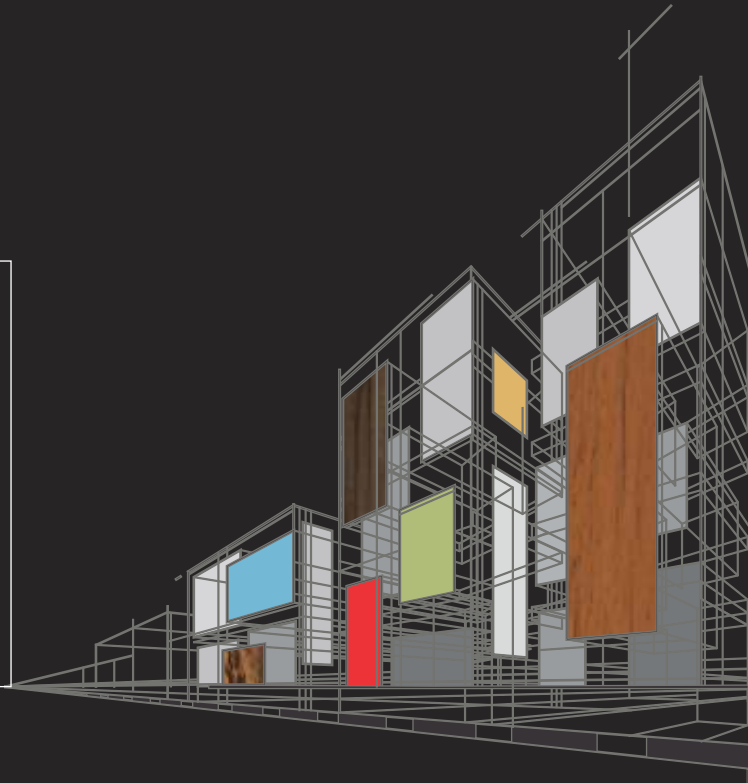

- Anti-fungal protection
- Lightweight – reduces frame loading and installation costs
- Capable of being shaped and formed without loss of surface integrity
- High strength and rigidity – outstanding deflection capacity and bending strength
- Short time for mounting, as a result it cuts down construction time
- Good sound insulation and low resonance factor – reduces unwanted vibrational noise
- Ease of installation and fabrication – can be cut, drilled, punched and stamped
- Resistance to extremes of weather exposure and temperature
- Excellent UV characteristics – Retains color after long exposure
- Smooth paint finish and lacquering – three layer PVDF 70% Kynar-500
- Superior flatness – ideal for creating smooth, monolithic surfaces
- High impact resistance
- Very low coefficient of expansion

# ACP

## FR Range

From the lap of luxury and straight to your classy dwellings, Alex presents a fantastic collection of Fire Retardant ACPs. For added safety, this range stops the spread of fire under any condition and works as a fire safety blanket that is immaculately paired with features of modern ACP.

## Marwud

MARWUD RANGE is a premium range introduced by Alex Panels which consists of Wood, Marble, Brick range of colors that enhance the look and feel of your exterior elevation as these can be used mostly in Exteriors of Houses, Farmhouses, Hotels, etc. These panels give the most elegant and glamorous look to your building structure at the same time giving a real wood & stone effect.

# CSR AND SUSTAINABILITY

QUANTUM UNIVERSITY

The Black Cobra Group decided to broaden its horizons and give back to the society by improving the standards of education, which it did by opening its university in Uttarakhand's Roorkee – Quantum University. It is ranked among the top 20 B-schools in North India and among the top 60 B-schools in India by the Times Group.

The perfect amalgamation of high-quality education and innovative teaching practices has made Quantum University Roorkee, the best university of engineering and technology in the region. While expanding the horizons of higher education in India, Quantum University has successfully established itself as a well-known holistic education provider, not only in Uttarakhand but in entire India. The university is approved by UGC and takes huge pride in its unique aspects such as interdisciplinary pedagogy, updated and future-ready curriculum, Passion Programs (PROPS) and much more. At Quantum, the way education is imparted to students, not only expands their knowledge base but also develops problem-solving abilities, effective communication skills and interpersonal skills in them. The university focuses on the overall development of the students and imbibes positive competitive abilities in them so that they become lifelong learners and contribute to national development.

## OTHER INITIATIVES

Black Cobra Group strives every day to focus on new issues and help out the society in every which way possible. With the help of our employees and associates, we have been making a difference in people's lives and putting a smile on their faces.

Under our CSR initiatives, we have carried out several food and clothing donation drives to help the people in need. In addition, we have also embraced the importance of education for girls and women in our society. To pledge our support towards educating girls, we also regularly sponsor the education of several girls.

# GREEN INITIATIVE GO GREEN

We as a company believe that we must do our part to produce a product which minimizes the impact on Mother Nature. By taking this responsibility, our next generation can inherit a world in which they can have better future.

Black Cobra continuously strives to improve its operations and production process to reduce its carbon footprint.

We do this by:

- Choosing to deal with raw material suppliers who are certified and accredited with environment friendly practices
- Choosing to deal with raw material suppliers who are located within a 500 miles radius of our factory, so as to reduce the emissions of CO<sub>2</sub>, from transportation, which deliver the raw materials to us
- Embracing manufacturing processes that do not emit any green house gases
- Using more than 50% renewable energy (such as solar energy) to power our manufacturing plants
- Recycling all our waste production using environmentally friendly practices
- Recycling the LDPE resins by selling them to special recycling facilitates
- Recycling of waste water
- Installing a regenerative catalytic thermal oxidizer on our paint coating lines to reduce the release of Volatile Organic Compounds (VOC) during the paint coating process
- Using energy saver bulbs to light all areas of our manufacturing facility and administrative buildings
- Using raw materials which are biodegradable and non-toxic

These may be just some small steps which we have consciously decided to embrace and we will always strive to implement more ways to reduce our impact on the world's fragile environment. We are certified by IGBC and meet their criteria so as to be classified as a 'Green Building Material'. Our products proudly contribute to LEED points for buildings to be sustainable and environmental friendly.
